HOPE VALLEY
PRESCHOOL Newsletter
June 2019

Quinn and Walker are planting their tomato plants in our outside garden.

Preschool Investigative Study: Plants

- Where do plants come from?
- Where do seeds come from?
- Why do plants die?
- How long will it take for a plant to grow?
- Can a plant be taller than I am?
- How does a seed become a plant?
- Where do plants come from that you buy at a store?
- Can you eat a plant?
- Can a plant grow in the winter?

We have been busy asking questions and investigating the answers through all of our activities! As we study plants, we are learning many science concepts. As we investigate, we use our thinking skills

to investigate, solve problems, and make predictions.

Please take a tour around our classrooms and see all of the things we are learning.

MARK YOUR CALENDARS

- 4th Flower Hop- Toddler/Y2's
- 6th Preschool Graduation 6 p.m.
- 7th Pajama day- Preschoolers
- 10th Museum Visits: *Slithering Snakes*
- 12th Washing Bugs- Toddler/Y2's
- 14th Spanish with Ms. Mariela
- 12th Hula Hoop Hop- Preschoolers
- 14th Donuts with Dad
- 18th Summer Picnic- Toddler/Y2's
- 21st Homemade Instrument Parade for World Music Day- Preschoolers
- 26th Water Play w/ Sponges- Toddler/Y2's
- 27th Wear your Sunglasses- Preschoolers

Parents are invited to come and play music instruments.

Fitness Fridays

- 7 Body Shapes and Sizes
- 14 Hopping
- 21 Follow the Leader
- 28 Ways to Travel

Our Specials

Mon	Tues	Wed	Thurs	Fri
Math Lesson	Literacy Lesson	Music Class	Spanish Class	Math Lesson
		Computer Class	Soccer Shots	

FOCUS ON LITERACY
Book of the Month

During June, our preschoolers will enjoy reading, ***One HOT Summer Day*** by Nina Crews. "It's summer and it is Hot.

Dogs pant. Women carry umbrellas for the shade. But the running, dancing narrator is busy. Drawing. Teasing her shadow. Eating Popsicles.”

June Science Program

Davis is using a magnifying glass to watch the ant climb the tree.

This month the N.C. Museum of Natural Science presents, *Slithering Snakes*. The children will learn the differences between venomous and non-venomous snakes native to North Carolina, while viewing some captivating slides of these often, misunderstood reptiles. Following the slide show, we will meet some live non-venomous snakes and have a safe opportunity to touch them.

Infants & Toddlers

This month our activities will center on sunny days, water, bugs, worms, and farm animals.

During the summer months, young children enjoy the warmth of the sun and watching the small insects. Toddlers are fascinated by anything that moves, including bugs. Be on the lookout for small containers of bugs, magnifying glasses, and cardboard binoculars.

Exploring water with hands and feet can also be lots of fun. Our toddlers will enjoy wet sponge play and washing trikes and dolls. Playing with water is soothing for infants, as well.

HAPPY BIRTHDAY

Kobbie	Kathryn E.	Olivia W.
Arthur B.	Wilhelmina	Aja R.
Josalyn	Lily M.	Kai W.
James B.	Yafei	Quinn

SPANISH

We will continue working on the days of the week and we will also talk about summer clothing:

Hat-sombrero	Shorts-pantalón corto
Shirt-camisa	Sunglasses-lentes

MUSIC

This month our children will learn to identify classical music and learn that music is relaxing. We'll listen and then move to the rhythm. And, yes, we'll learn some new summer songs and the accompanying sign language.
